

CAMEC ROLL OUT AWNINGS

The Camec roll out awning is a lightweight manual awning that is suitable for all caravans, pop tops and motorhomes. The stylish vinyl is available in black/white fade or a white/black fade. The UV treated vinyl has been tested to Australian conditions for over 1000 hours.

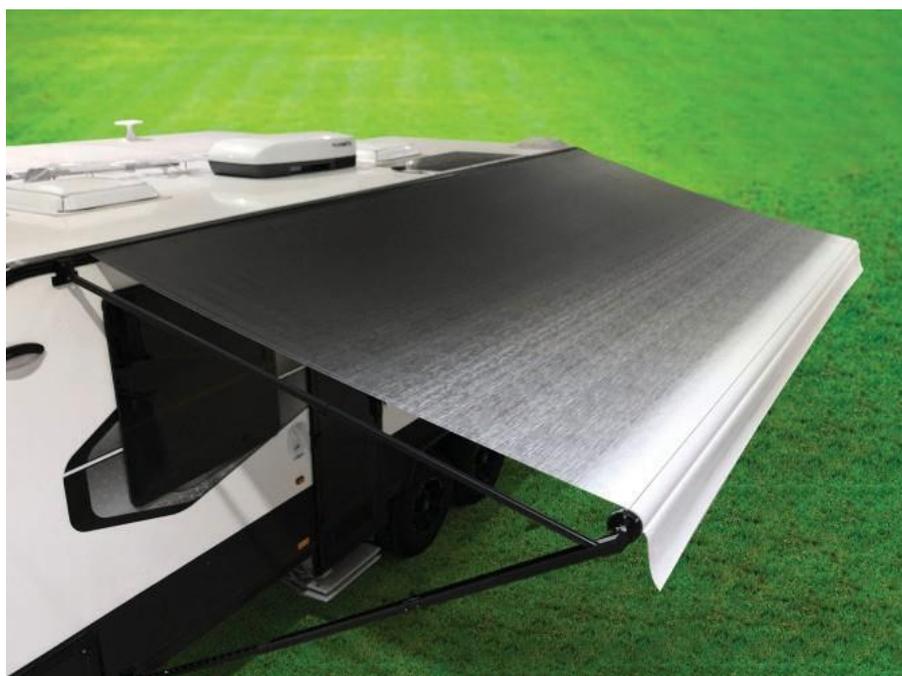

The awning consists of 2 foldaway arms that can be unclipped from main housing and pegged at 90 degrees to the ground or extended out to clamp onto the side of the caravan.

The awning is wall mounted and come with either black or white legs.

The Camec awning delivers the perfect balance of shade whilst allowing you the freedom to enjoy the outdoors without damage from the harsh sun.

FEATURES

- Multi-Layer Vinyls - Double wrapped with Weather guard to protect from scratching, fading, mildew and staining.
- Remote Storage Lock - Allows convenient release of travel lock at hand height.
- Heavy Duty Brackets - Strong and sturdy brackets for the roughest off road journeys.
- Single Track Slider - Eliminates seizing during setup. Rafters will glide on every set up.
- Canopy Clamps - The roof braces have inbuilt canopy clamps to provide extra tension on your awning fabric that limits flapping.
- 2 year warranty.

AWNING INSTALLATION

Roll out awnings require two separate components to make a complete unit.

- 1) Awning fabric - Available from 14' - 18' and available in white / black vinyl or black / white vinyl.
- 2) Awning Legs - These are the legs and arms that attach to the caravan. Available in black or white with standard brackets.
- 3) Refer to the installation manual for specific installation steps.

AWNING SET UP

To set up the awning, you unlock the travel lock and pull the spring-loaded awning roller out using the strap. Extend the legs to achieve your desired roof height, then extend the roof braces to hold the fabric taut. The awning can be used with the legs attached to the RV or they can be released and pegged to the ground.
